IMPORTANT NOTE: BLOCK 1 STARTS WITH AN INTRO/DELOAD WEEK BEFORE INCREASING THE VOLUME/INTENSITY FOR THE REMAINING 4 WEEKS															
WEEK 1	EXERCISE	LAST-SET INTENSITY TECHNIQUE	WARM-UP SETS	WORKING SETS	REPS	TRACKING LOAD AND REPS				EARLY SET RPE	LAST SET RPE	REST	SUBSTITUTION OPTION 1	SUBSTITUTION OPTION 2	NOTES
						SET 1	SET 2	SET 3	SET 4						
UPPER #1	<u>Meadows Incline DB Lateral Raise</u>	N/A	1	3	10-12					~7-8	~9	~1-2 min	<u>Cuffed Behind-The-Back Lateral Raise</u>	<u>DB Lateral Raise</u>	Lie down on your side on a ~30° bench. Start with the DB in front of you, raise the DB to parallel to the floor and lower the DB behind you, feeling a deep stretch in your delts, then reverse this motion (2 reps have now been completed). No pausing between reps.
	<u>Wide-Grip Pull-Up</u>	N/A	2-3	2	8-10					~7	~9	~2-3 min	<u>Wide-Grip Machine Pulldown</u>	<u>Wide-Grip Lat Pulldown</u>	1.5x shoulder width overhand grip. Slow 2-3 second negative. Feel your lats pulling apart on the way down. Slight 0.5-1 second pause at the bottom, then lift your chest up and drive your elbows down as you lift yourself up. Don't be afraid to use assistance. Add weight if needed. Keep the form tight and controlled!
	<u>Flat Machine Chest Press</u>	N/A	2-3	2	8-10					~7	~9	~3-5 min	<u>Flat DB Bench Press</u>	<u>Barbell Bench Press</u>	1 second pause on the chest while maintaining tension on the chest.
	<u>Chest-Supported Machine Row</u>	N/A	2	2	8-10					~7	~9	~2-3 min	<u>Chest-Supported T-Bar Row</u>	<u>Chest-Supported Incline DB Row</u>	Set the chest pad up so you get a deep stretch on each rep.
	<u>Bottom-Half Seated Cable Flye</u>	N/A	2	2	8-10					~7-8	~9	~2-3 min	<u>Bottom-Half DB Flye</u>	<u>Bottom-Half Pec Deck</u>	All reps and sets are to be performed in the bottom half of the ROM. Focus on feeling a deep stretch in your pecs at the bottom of each rep.
	<u>Seated Super-Bayesian High Cable Curl</u>	N/A	1	2	12-15					~7-8	~9	~1-2 min	<u>Bayesian Cable Curl</u>	<u>Incline DB Stretch Curl</u>	Set up the cable at hand height and feel a deep stretch on each rep. Curl until the handle reaches the bench.

LOWER #1	<u>Seated Leg Curl</u>	N/A	1-2	2	8-10					~7-8	~9	~1-2 min	<u>Lying Leg Curl</u>	<u>Nordic Ham Curl</u>	Lean forward over the machine to get a maximum stretch in your hamstrings.
	<u>Bottom-Half Smith Machine Squat</u>	N/A	2-4	2	6-8					~7	~8	~3-5 min	<u>Bottom-Half DB Bulgarian Split Squat</u>	<u>High-Bar Back Squat</u>	All reps and sets are to be performed in the bottom half of the ROM. Once you are under the bar, set up your feet as you would a normal squat and then bring them forward ~3-6 inches. This will cause you to lean back into the bar slightly, allowing for a more upright squat, while also placing more tension on the quads. If your heels are raising at the bottom, you may need to bring your feet more forward. If your feet feel like they are slipping or your lower back is rounding at the bottom, try bringing your feet back a bit.
	<u>Glute-Ham Raise</u>	N/A	1-2	2	10-12					~7	~8	~2-3 min	<u>Single-Leg DB Hip Thrust</u>	<u>DB RDL</u>	Cut out the top ~25% of the ROM, where there will be minimal tension on the hamstrings. Squeeze your hamstrings to pull yourself up!
	<u>Leg Extension</u>	N/A	1-2	2	10-12					~7-8	~9	~1-2 min	<u>Reverse Nordic</u>	<u>Sissy Squat</u>	Set the seat back as far as it will go while still feeling comfortable. Grab the handles as hard as you can to pull your butt down into the seat. Use a 2-3 second negative. Feel your quads pulling apart on the negative.
	<u>Standing Calf Raise</u>	N/A	1	3	15-20					~7-8	~9	~1-2 min	<u>Leg Press Calf Press</u>	<u>Seated Calf Raise</u>	1-2 second pause at the bottom of each rep. Instead of just going up onto your toes, think about rolling your ankle back and forth on the balls of your feet.
	<u>Machine Hip Abduction</u>	N/A	1-2	2	12-15					~7-8	~9	~1-2 min	<u>Cable Hip Abduction</u>	<u>Lateral Band Walk</u>	If possible, use pads to increase the range of motion on the machine. Lean forward and grab onto the machine rails to stretch the glutes further.

	<u>Smith Machine Deficit Row</u>	N/A	2-3	2	8-10					~7	~9	~3-4 min	<u>Pendlay Deficit Row</u>	<u>Helms Row</u>	Focus on getting a big stretch and touch your stomach/chest on each rep!
	<u>Bottom-Half 45° Incline DB Press</u>	N/A	2-3	2	10-12					~7	~9	~2-3 min	<u>Bottom-Half 45° Incline Smith Machine Press</u>	<u>Bottom-Half 45° Incline Barbell Press</u>	All reps and sets are to be performed in the bottom half of the ROM. 1 second pause on the chest on each rep while maintaining tension on the pecs.
	<u>Neutral-Grip Lat Pulldown</u>	Integrated Partial (All Sets)	2	2	8-10					~7	~9	~2-3 min	<u>Neutral-Grip Pullup</u>	<u>Cross-Body Lat Pull-Around</u>	Do these pulldowns with the handle more out in front of you, more like a cross between pullover and a pulldown. Focus on feeling your lats working more than the weight you're using. On all sets, alternate full-ROM reps and half-ROM reps (i.e. do 1 rep with full-ROM, then 1 rep half-ROM (in the stretched/top half), then 1 rep full-ROM, then 1 rep half-ROM). Repeat until you've reached the target reps (partial reps count towards the rep count).
	<u>Super-Stretch Reverse Pec Deck</u>	N/A	1	2	10-12					~7-8	~9	~1-2 min	<u>Bent-Over Reverse DB Flye</u>	<u>Cable Reverse Flye</u>	Face side on to the machine and pull your arm across your body to pre-stretch your rear delt. Do reverse flyes 1 arm at a time. Start with your weaker arm.
	<u>Katana Triceps Extension</u>	N/A	1	2	10-12					~7-8	~9	~1-2 min	<u>Overhead Cable Triceps Extension (Bar)</u>	<u>DB Skull Crusher</u>	Flare your elbows out at about 45° and keep your elbows locked in place as you complete the extensions.

LOWER #2	<u>Barbell RDL</u>	N/A	2-3	2	8-10					~5	~5-6	~3-5 min	<u>DB RDL</u>	<u>Deadlift</u>	The RPE is intentionally low here because these will cause a lot of muscle damage. Don't be tempted to go too heavy. To keep tension on the hamstrings, stop about 75% of the way to full lockout on each rep (i.e. stay in the bottom 3/4 of the range of motion).
	<u>Super-ROM Leg Press</u>	N/A	2-4	2	8-10					~7	~8	~3-5 min	<u>Single-Leg Leg Press</u>	<u>High-Bar Back Squat</u>	Feet lower on the platform for more quad focus. Get as deep as you can without excessive back rounding. Control the negative and do a slight pause at the bottom of each rep.
	<u>Smith Machine Reverse Lunge</u>	N/A	2-3	2 per leg	10-12					~7	~8	~2-3 min	<u>DB Reverse Lunge</u>	<u>DB Walking Lunge</u>	Minimize contribution from the back leg. Mind-muscle connection with your glutes here!
	<u>Weighted 45° Hyperextension</u>	N/A	1	2	10-12					~7	~9	~1-2 min	<u>Smith Machine Good Morning</u>	<u>Good Morning (Light Weight)</u>	Squeeze your glutes hard at the top of each rep. Slow controlled reps on the way down, followed by an explosive positive.
	<u>Bottom-Half Standing Calf Raise</u>	N/A	1	3	10-12					~7-8	~9	~1-2 min	<u>Seated Calf Raise</u>	<u>Donkey Calf Raise</u>	All reps and sets are to be performed in the bottom half of the ROM. 1-2 second pause at the bottom of each rep. 	<u>Machine Hip Adduction</u>	N/A	1-2	2	12-15					~7-8	~9	~1-2 min	<u>Cable Hip Adduction</u>	<u>Copenhagen Hip Adduction</u>	Mind-muscle connection with your inner thighs. These are great for adding thigh mass from the front! Push them hard!

	Weak Point Exercise 2 (optional)	N/A	1-3	2	8-12					~7-8	~9	~1-3 min			If your weak point is feeling recovered (not sore or fatigued) then feel free to hit Exercise 2. If your weak point is feeling tired or sore, do not perform the second weak point exercise this week.
	<u>EZ-Bar Cable Curl</u>	N/A	1	2	10-12					~7-8	~9	~1-2 min	<u>EZ-Bar Curl</u>	<u>DB Curl</u>	Set up the cable at the lowest position. Maintain constant tension on the biceps. Slow, controlled reps!
	<u>EZ-Bar Skull Crusher</u>	N/A	1	2	10-12					~7-8	~9	~1-2 min	<u>DB Skull Crusher</u>	<u>Overhead Cable Triceps Extension (Rope)</u>	Feel a nasty stretch on the triceps throughout the entire negative. Pause for 1 second in the stretch part of each rep.
	<u>Bottom-Half Incline DB Curl</u>	N/A	1	2	12-15					~7-8	~9	~1-2 min	<u>Bottom-Half Bayesian Cable Curl</u>	<u>Incline DB Stretch-Curl</u>	All reps and sets are to be performed in the bottom half of the ROM. Keep your upper back planted against the bench. Go light on these and focus on feeling your biceps pull and squeeze.
	<u>Triceps Pressdown (Bar)</u>	N/A	1	2	12-15					~7-8	~9	~1-2 min	<u>Triceps Pressdown (Rope)</u>	<u>DB Triceps Kickback</u>	Focus on squeezing your triceps to move the weight

LOWER #1	<u>Seated Leg Curl</u>	Lengthened Partial (Extend Set)	1-2	3	8-10					~8-9	10	~1-2 min	<u>Lying Leg Curl</u>	<u>Nordic Ham Curl</u>	Lean forward over the machine to get a maximum stretch in your hamstrings. Once you hit failure on the final set, continue with lengthened partials in the top half of the ROM, until you can no longer achieve a full half rep.
	<u>Bottom-Half Smith Machine Squat</u>	N/A	2-4	3	6-8					~7-8	~8-9	~3-5 min	<u>Bottom-Half DB Bulgarian Split Squat</u>	<u>High-Bar Back Squat</u>	All reps and sets are to be performed in the bottom half of the ROM. Once you are under the bar, set up your feet as you would a normal squat and then bring them forward ~3-6 inches. This will cause you to lean back into the bar slightly, allowing for a more upright squat, while also placing more tension on the quads. If your heels are raising at the bottom, you may need to bring your feet more forward. If your feet feel like they are slipping or your lower back is rounding at the bottom, try bringing your feet back a bit.
	<u>Glute-Ham Raise</u>	N/A	1-2	3	10-12					~7-8	~8-9	~2-3 min	<u>Single-Leg DB Hip Thrust</u>	<u>DB RDL</u>	Cut out the top ~25% of the ROM, where there will be minimal tension on the hamstrings. Squeeze your hamstrings to pull yourself up!
	<u>Leg Extension</u>	Lengthened Partial (Extend Set)	1-2	3	10-12					~9	10	~1-2 min	<u>Reverse Nordic</u>	<u>Sissy Squat</u>	Set the seat back as far as it will go while still feeling comfortable. Grab the handles as hard as you can to pull your butt down into the seat. Use a 2-3 second negative. Feel your quads pulling apart on the negative. Once you hit failure on the final set, continue with lengthened partials in the bottom half of the ROM, until you can no longer achieve a full half rep.
	<u>Standing Calf Raise</u>	Weighted Static Hold (30 sec hold in the stretch)	1	3	15-20					~9	10	~1-2 min	<u>Leg Press Calf Press</u>	<u>Seated Calf Raise</u>	1-2 second pause at the bottom of each rep. Instead of just going up onto your toes, think about rolling your ankle back and forth on the balls of your feet. For the weighted static hold, after the final rep of the final set, rather than reracking the weight immediately, pause at the very bottom of the ROM (with full tension still on the calves) and maintain this hold for 30 seconds.
	<u>Machine Hip Abduction</u>	Failure	1-2	3	12-15					~9	10	~1-2 min	<u>Cable Hip Abduction</u>	<u>Lateral Band Walk</u>	If possible, use pads to increase the range of motion on the machine. Lean forward and grab onto the machine rails to stretch the glutes further.

LOWER #1	<u>Seated Leg Curl</u>	Lengthened Partial (Extend Set)	1-2	3	8-10					~8-9	10	~1-2 min	<u>Lying Leg Curl</u>	<u>Nordic Ham Curl</u>	Lean forward over the machine to get a maximum stretch in your hamstrings. Once you hit failure on the final set, continue with lengthened partials in the top half of the ROM, until you can no longer achieve a full half rep.
	<u>Bottom-Half Smith Machine Squat</u>	N/A	2-4	3	6-8					~7-8	~8-9	~3-5 min	<u>Bottom-Half DB Bulgarian Split Squat</u>	<u>High-Bar Back Squat</u>	All reps and sets are to be performed in the bottom half of the ROM. Once you are under the bar, set up your feet as you would a normal squat and then bring them forward ~3-6 inches. This will cause you to lean back into the bar slightly, allowing for a more upright squat, while also placing more tension on the quads. If your heels are raising at the bottom, you may need to bring your feet more forward. If your feet feel like they are slipping or your lower back is rounding at the bottom, try bringing your feet back a bit.
	<u>Glute-Ham Raise</u>	N/A	1-2	3	10-12					~7-8	~8-9	~2-3 min	<u>Single-Leg DB Hip Thrust</u>	<u>DB RDL</u>	Cut out the top ~25% of the ROM, where there will be minimal tension on the hamstrings. Squeeze your hamstrings to pull yourself up!
	<u>Leg Extension</u>	Lengthened Partial (Extend Set)	1-2	3	10-12					~9	10	~1-2 min	<u>Reverse Nordic</u>	<u>Sissy Squat</u>	Set the seat back as far as it will go while still feeling comfortable. Grab the handles as hard as you can to pull your butt down into the seat. Use a 2-3 second negative. Feel your quads pulling apart on the negative. Once you hit failure on the final set, continue with lengthened partials in the bottom half of the ROM, until you can no longer achieve a full half rep.
	<u>Standing Calf Raise</u>	Weighted Static Hold (30 sec hold in the stretch)	1	3	15-20					~9	10	~1-2 min	<u>Leg Press Calf Press</u>	<u>Seated Calf Raise</u>	1-2 second pause at the bottom of each rep. Instead of just going up onto your toes, think about rolling your ankle back and forth on the balls of your feet. For the weighted static hold, after the final rep of the final set, rather than reracking the weight immediately, pause at the very bottom of the ROM (with full tension still on the calves) and maintain this hold for 30 seconds.
	<u>Machine Hip Abduction</u>	Failure	1-2	3	12-15					~9	10	~1-2 min	<u>Cable Hip Abduction</u>	<u>Lateral Band Walk</u>	If possible, use pads to increase the range of motion on the machine. Lean forward and grab onto the machine rails to stretch the glutes further.

Start with the DB in front of you, raise the DB to parallel to the floor and lower the DB behind you, feeling a deep stretch in your delts, then reverse this motion (2 reps have now been completed). No pausing between reps.
	<u>Wide-Grip Lat Pulldown</u>	Lengthened Partial (Extend Set)	2-3	3	10-12					~8-9	~9-10	~2-3 min	<u>Wide-Grip Pull-Up</u>	<u>Wide-Grip Machine Pulldown</u>	Think about pulling your elbows "down" and "in". Once you hit the Last Set RPE on the final set, switch to partial reps. These should be the top half of the ROM. Stop once you have 0-1 half reps left in the tank.
	<u>Flat Smith Machine Bench Press</u>	Lengthened Partial (Extend Set)	2-3	3	10-12					~8-9	~9-10	~3-5 min	<u>Flat DB Bench Press</u>	<u>Barbell Bench Press</u>	1 second pause on the chest on each rep while maintaining tension on the pecs. Once you hit the Last Set RPE on the final set, switch to partial reps. These should be the bottom half of the ROM. Stop once you have 0-1 half reps left in the tank.
	<u>Dual-Handle Elbows-Out Cable Row</u>	Lengthened Partial (Extend Set)	2	3	10-12					~8-9	~9-10	~2-3 min	<u>Arm-Out Single-Arm DB Row</u>	<u>Chest-Supported Machine Row</u>	Flare your elbows out ~45°. Smooth, controlled reps. Once you hit the Last Set RPE on the final set, switch to partial reps. These should be the bottom half of the ROM. Stop once you have 0-1 half reps left in the tank.

	<u>Bottom-Half Hack Squat</u>	N/A	2-4	3	8-10					~7-8	~8-9	~3-5 min	<u>Bottom-Half DB Bulgarian Split Squat</u>	<u>High-Bar Back Squat</u>	All reps and sets are to be performed in the bottom half of the ROM. Allow your knees to come forward (past your toes). Focus the tension on your quads.
	<u>Single-Leg DB Hip Thrust</u>	N/A	1-2	3	8-10					~7-8	~8-9	~2-3 min	<u>Glute-Ham Raise</u>	<u>Reverse Hyper</u>	Slow 2-3 second negative. Explode with control on the way up. Squeeze your glutes hard at the top of the movement.

Grab the handles as hard as you can to pull your butt down into the seat. Use a 2-3 second negative. Feel your quads pulling apart on the negative. Once you hit failure on the final set, continue with lengthened partials in the bottom half of the ROM, until you can no longer achieve a full half rep.
	<u>Standing Calf Raise</u>	Weighted Static Hold (30 sec hold in the stretch)	1	4	12-15					~9	10	~1-2 min	<u>Leg Press Calf Press</u>	<u>Seated Calf Raise</u>	1-2 second pause at the bottom of each rep. Instead of just going up onto your toes, think about rolling your ankle back and forth on the balls of your feet. For the weighted static hold, after the final rep of the final set, rather than reracking the weight immediately, pause at the very bottom of the ROM (with full tension still on the calves) and maintain this hold for 30 seconds.
	<u>Machine Hip Abduction</u>	Failure	1-2	3	10-12					~9	10	~1-2 min	<u>Cable Hip Abduction</u>	<u>Lateral Band Walk</u>	If possible, use pads to increase the range of motion on the machine. Lean forward and grab onto the machine rails to stretch the glutes further.

Repeat until you've reached the target reps (partial reps count towards the rep count).
	<u>Super-Stretch Reverse Pec Deck</u>	Failure	1	3	12-15					~9	10	~1-2 min	<u>Bent-Over Reverse DB Flye</u>	<u>Cable Reverse Flye</u>	Face side on to the machine and pull your arm across your body to pre-stretch your rear delt. Do reverse flyes 1 arm at a time. Start with your weaker arm.
